\* первоначально в расчет процента потерь вкралась ошибка, так как подсчитывалось не количество пропусков отчетов, а случаи, когда интервал времени между отчетами превышал 30 мин, т.е. не учитывались несколько пропущенных отчетов подряд. Были получены цифры 23 случая пропусков на 4237 потенциальных передач (% потерь = 0.54%). При более тщательном рассмотрении были выявлены случаи пропусков в передаче нескольких отчетов подряд. Выявлен один большой пропуск в течение 3-х часов (пропуск 8 отчетов подряд).
