# LET'S SCREW A PLANE

# TOOLS

SCREWS

A SCREW DRIVER

MAGIC CARDBOARD

A CUTTER

A HOLE PUNCHER

Step 1: Gather Your Materials
- You'll need one box (choose any size you like) and some extra cardboard for additional parts.
- Get your "magic kit" ready, which includes things like a cutter, screws.
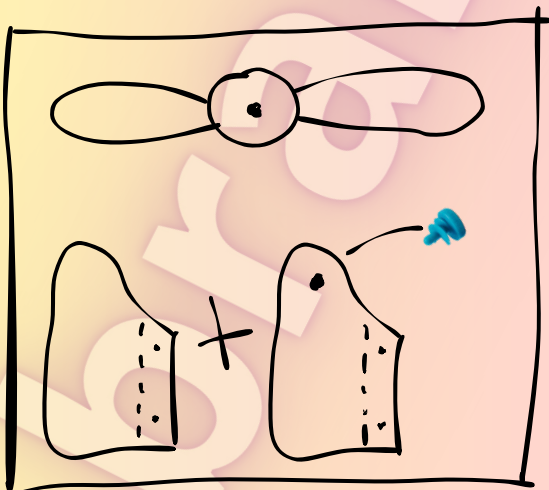

Step 2: Prepare the Box
- Use a hole puncher to mark where you will cut the box. Then, cut along the lines with a box cutter. You can give it any shape you want.

Step 3: Make the Wings
- Draw and cut out the airplane wings from the cardboard.
- Punch holes in the wings using the hole puncher. To make the cardboard easier to bend, lightly score along the fold lines with the hole puncher and then fold.
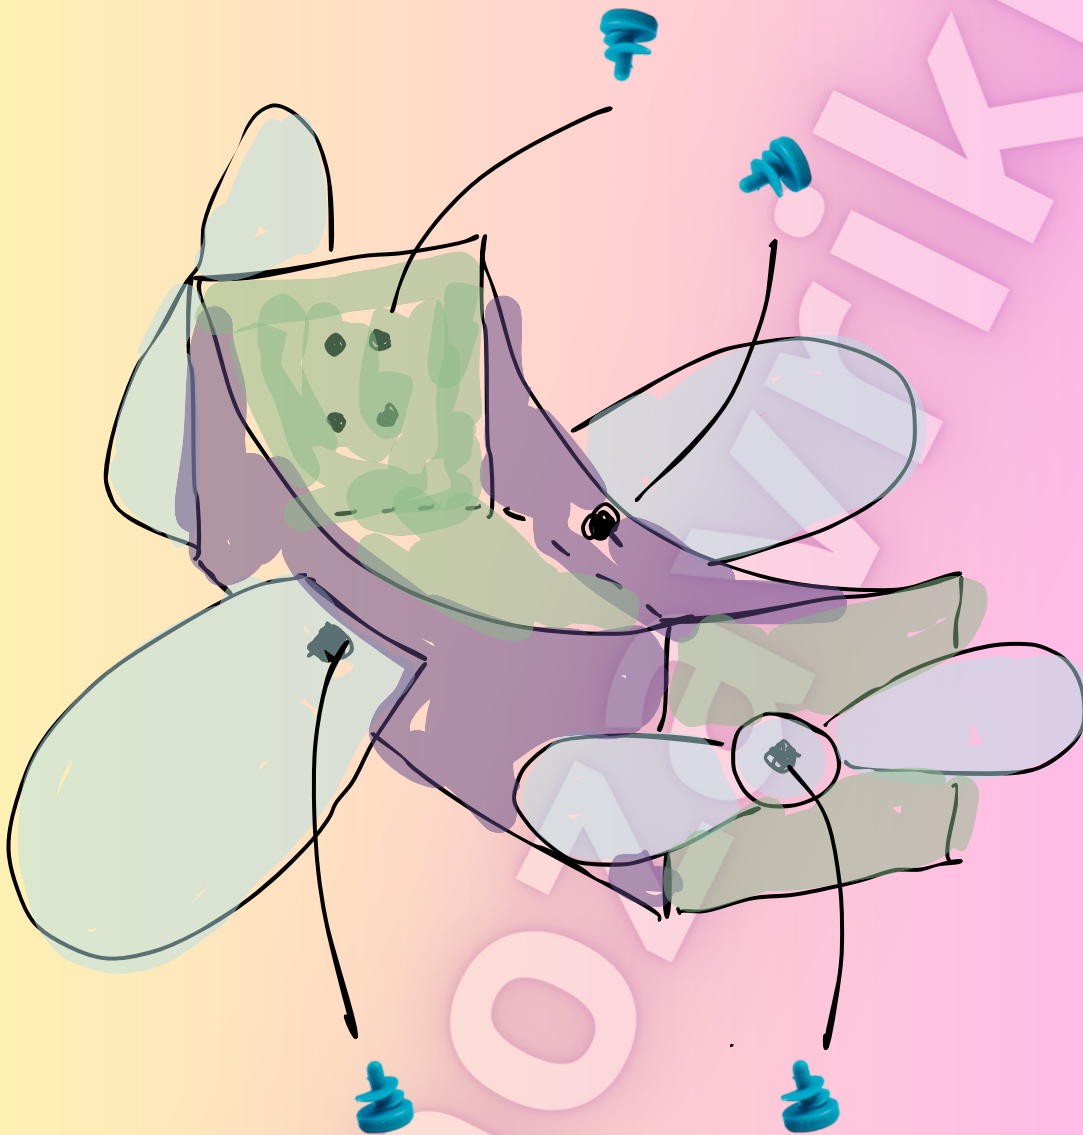

Step 4: Make the Propeller and Tail
- Draw and cut out the propeller and tail from the cardboard.
- Punch holes where the parts will connect.
- Attach the propeller and tail together using a small screw.

# Step 5: Assemble the Airplane

- Attach all the parts of the airplane using small screws. You can add extra details and decorate your airplane any way you like.

# Step 6: Share Your Creation

- Share your finished airplane with us to get a discount on your next kit! You can submit your project on our website at brainozavriki.ru or send a detailed review with photos to brainozavriki@mail.ru.
